SUMMARY

Currently I am the beginner in this field.

However, I have had some IT/technical experience on this filed on my previous job. I was testing new IT program (for online gambling) and proposed solutions (not just indicating the problem) for improving it. My recommendations were further taken into account when updating the program.

I have theoretical and practical knowledge that I gained on the courses.

As a benefit for IT companies involved in online gambling I have significant experience in online sports analytics (trader) for 6.5 years and very good understanding of this business.
